PolyWorks
DataLoop™ 2024

Data Management &
Digital Connectivity Solutions

Manage Vast Amounts of 3D Measurement Data Efficiently Using Cloud Storage

PolyWorks | DataLoop™ 2024 allows you to leverage the full benefits of cloud storage:

- ▶ Set up a highly scalable infrastructure that adapts instantaneously to your storage needs
- ▶ Replicate data files automatically across multiple data centers to ensure reliability
- ▶ Deploy a cost-effective storage solution without compromise

Create Custom Web-Based Views of the 3D Measurement Database

Review 3D measurement results in a standard Web browser through our extensive set of standard and special-purpose widgets created within Excel:

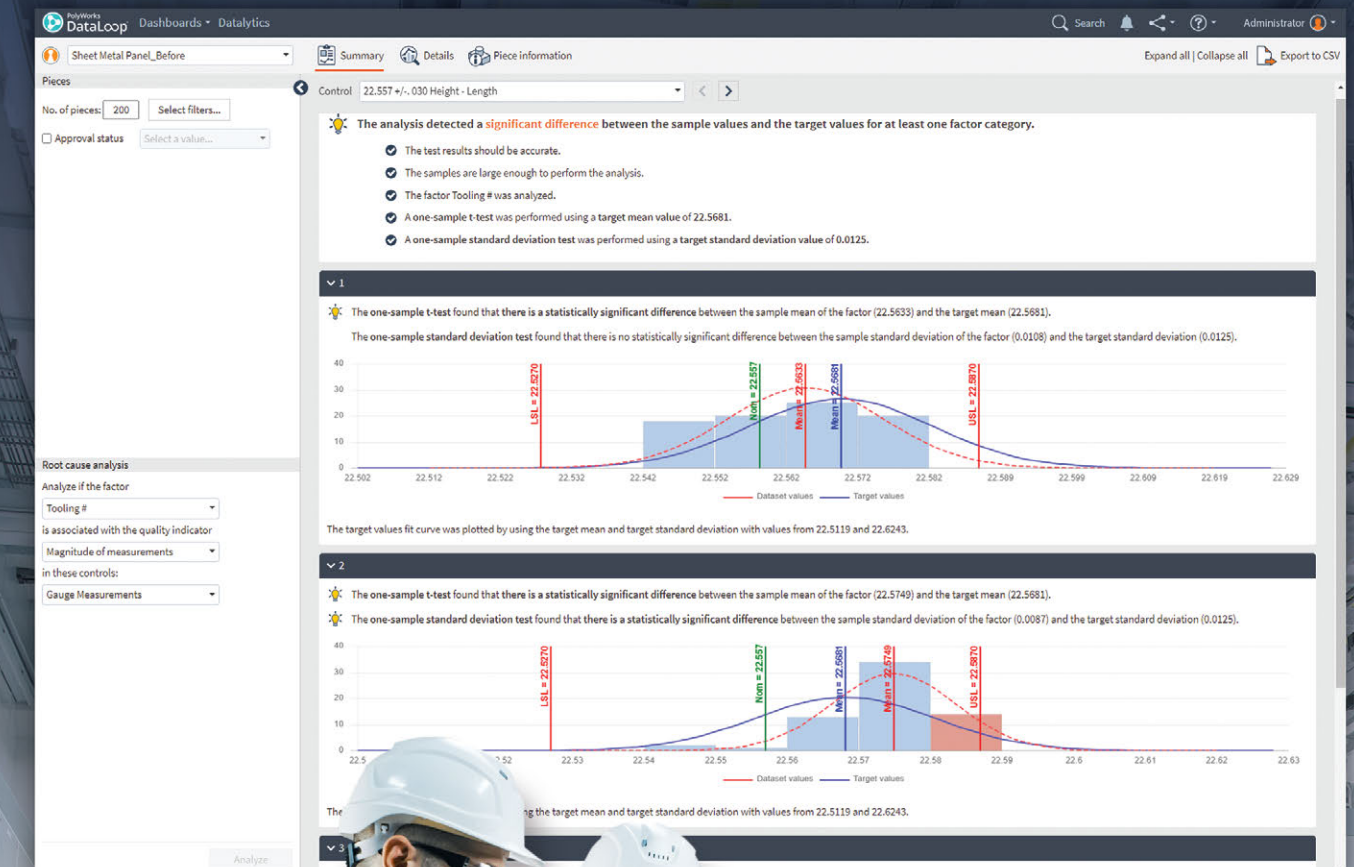

- ▶ Display the 3D measurement results of one or multiple pieces horizontally
- ▶ Create an unlimited number of widgets within a dashboard
- ▶ Leverage Excel's extensive mathematical and charting functionalities

Detect and Resolve Manufacturing Issues as Soon as They Occur

The PolyWorks|DataLoop Web Interface facilitates your root cause analyses by quickly highlighting problematic trends and providing statistical analyses of association. With version 2024, you can:

- ▶ Determine whether your processes are in control and stable using our native capability analysis toolbox, which now includes normal probability plots
- ▶ Analyze the distribution of measurements compared to the expected values using a t-test to determine if the measurements are significantly different than expected

Precisely Configure Accesses to your Data Management System

Security policies allow manufacturing organizations to control who can access data and what can be done with it. Version 2024 allows PolyWorks|DataLoop users to:

- ▶ Implement data access policies by assigning distinct storage spaces to different departments, business areas, or external suppliers
- ▶ Define security policies efficiently by creating new policies based on existing ones and enriching them with specific permissions
